

Social acceptance of mining activities

A. Main topics

- Social acceptance for mining
- Sustainable supply chain of raw materials

B. targeted audience

- 14-19 years old students

C. Key concepts

- Resolving problems related to obtaining raw materials
- Social aspect in mining activity
- Cooperation between stakeholders

D. Experimental activity

- The aim of the toolkit is to introduce students to the problem of obtaining social acceptance in mining activities. The students will be presented with case study, where social conflicts emerged in the context of raw materials extraction and management. Their task will be to identify the interests of individual stakeholders, work out a compromise and propose solutions that would help to solve the situation and bring benefits to all stakeholders. On these examples, the pupils will learn the importance of the social aspect in mining activity and see what problems can be caused by the lack of communication between stakeholders.

E. Toolkit material

- presentation
- case study sheets
