

Summary

Bioethanol from waste paper

	<p>Target age Age 14 and over</p>	
	<p>Level of difficulty <input type="checkbox"/> Easy <input checked="" type="checkbox"/> Medium <input type="checkbox"/> High</p> <p>Key words: <i>Recycling, Paper, Waste, Ethanol, Fuel</i></p>	
	<p>Abstract of the activity:</p> <p>Bioethanol (C₂H₅OH) is an alcohol coming mainly from biomass, exploitable as an environmentally compatible fuel that can partially be used in place of fossil fuels. Currently, a mixture of gasoline and bioethanol is commercially available, the E85, composed of 85% ethanol.</p> <p>In this experiment, waste paper will be used as raw material for the production of ethanol through the digestion with a safe commercial enzyme and fermentation with regular grocery store yeast. Ethanol will be then monitored through the use of either an ethanol sensor or a dye that, reacting selectively with alcohol, will change colour revealing its presence.</p>	
	<p>Learning Goals</p> <ul style="list-style-type: none"> • Be aware of the global warming • Learning about bioethanol • Learning how to produce ethanol from waste paper • Learning about the preciousness of waste and how it can be resource 	

Summary

	<p>Specific Abilities - <i>At the end of the activity the student will be able to:</i></p> <ul style="list-style-type: none"> • Use vials and pipettes • Apply the methods and verify their efficiency through systems • Be critical about the evaluation of lab results
	<p>Cross-curricula Links</p> <ul style="list-style-type: none"> • Ecology/Environment • Biology • Chemistry
	<p>Prerequisites - <i>Knowledge and skills necessary for carrying out the activity</i></p> <ul style="list-style-type: none"> • Laboratory techniques (weighting, use a blender)
	<p>Time requirement</p> <p><input type="checkbox"/> 1 h (first day) + <input type="checkbox"/> 2 h (the second day)</p> <p>Instruments: <i>blender, thermal plate, vials</i></p>
	<p>Learning and Teaching Support Materials - <i>What you can find in the toolkit:</i></p> <ol style="list-style-type: none"> 1. Lab Procedure (Module 1) 2. Students' Cards (Module 1) 3. Tutorial Video 4. Ppt presentation for preparing a lesson with tutorial videos 5. Evaluation questions
	<p>Authors - <i>from the University of Milano-Bicocca (Italy)</i></p> <p>Simona Binetti (simona.binetti@unimib.it)</p> <p>Alessia Le Donne (alessialedonne@gmail.com)</p> <p>Stefania Riva (s.riva60@campus.unimib.it)</p>
