

REMTECH EXPO

PARTNER'S NAME: CNR (IT)

ROLE in the event: Participant

EVENT'S TITLE: RemTech Expo

WHEN: 19-20-21 September 2018

WHERE: Ferrara (IT)

NUMBER OF PARTICIPANTS: 200

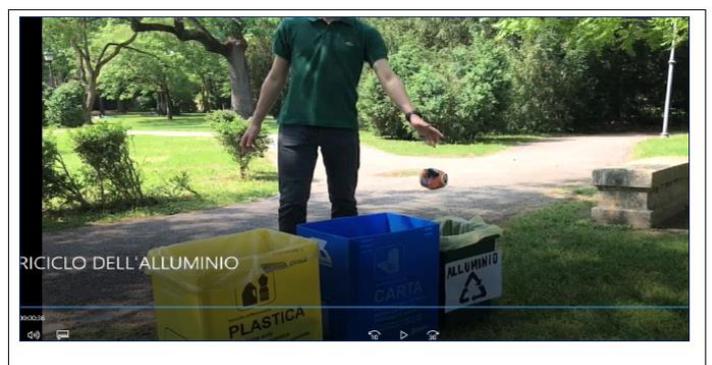

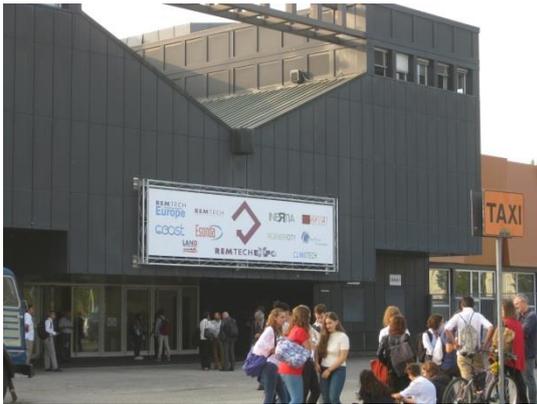

SHORT ABSTRACT: A class (4^M) of 17 year old students (n. 25) sets up a stand in this big international event in Ferrara. Since 2016 RemTech Expo is the only permanent international event dedicated to reclamation of contaminated sites, environmental and natural hazards, safety, maintenance and upgrading of the territory, climate changes and circular chemistry. The 2018 edition counted 6.000 Visitors, +270 Exhibitors, 400 Specialists, 100 Conferences.

The stand was visited at least by 200 visitors and the students interviewed by RiciclaTV. The work was prepared during the year by two conferences by Eleonora Polo (RM Ambassadors) about Circular Economy and Raw Critical Materials, followed by half a day of lab experiences and a gamestorming session to focus their ideas about what to present. The products were objects created from recycled waste, a film clip about metal recycling, a modern tale about the pollution of the river Po, a newspaper «from the future» and a model of an eco-sustainable city. During the three days they visited all the stands, followed some seminars, and attended in turn their stand explaining their project to visitors
