

DESCRIPTION OF THE WIDER SOCIETY EVENT

PARTNER'S NAME: Tallinn University of Technology (TalTech)

ROLE: organizer of a local event

EVENT'S TITLE: Researches`s Night Festival at Taltech

WHEN: 28.09.18

WHERE: Tallinn University of Technology (TalTech), Tallinn, Estonia

NUMBER OF PARTICIPANTS: 800

SHORT ABSTRACT (mention also the activities included in the event and Schools involved):

The various activities of the Researches`s Night Festival in Taltech took place over the campus of the University of Technology. Children, adolescents, adults, older people, students and entrepreneurs got to know more about science through workshops, meetings with researchers and laboratory visits. There were 40 different workshops and activities from robotics to chemical experiments, programming LEGO robots, Arduino or your own virtual reality world. Visitors could compete with drawing robot or racerobot in a labyrinth, improve a smartphone, work in a metal and woodwork laboratory, test various heat and light cameras, and much more. The TalTech Museum give an overview of the history of the University of Technology. The festival was attended by 800 participants.
